Owen Asher

College Park, MD 20740 | (240) 555-5555 | oasherfakecv@umd.edu | in/oasherfakelinkedin

OBJECTIVE

Mechanical Engineer experienced in applying research, problem solving, and team management skills. Seeking to provide cutting edge and academically informed solutions to the mechanical engineering research space.

EDUCATION

Ph.D. Mechanical Engineering Expected May 2026
University of Maryland **GPA:** 4.0 College Park, MD

- **Focus:** Thermal Fluid Sciences, Energy Systems
- **Dissertation:** “Development of Multi-Scale, Multi-Physics, Analysis Capability and its Application to Novel Heat Exchangers Design and Optimization”
- **Faculty Advisor:** Dr. Reinhard Radenmacher

M.S. Mechanical Power Engineering Oct. 2019
Cairo University **GPA:** 3.89 Giza, Egypt

- **Focus:** Thermal Fluid Sciences, CFD Simulations
- **Thesis:** “Flow Regimes, Thermal and Humidity Patterns in Ventilated Archeological Tombs, Valley of the Kings, Luxor”

B.S. Mechanical Power Engineering Oct. 2015
Cairo University **GPA:** 3.91 Giza, Egypt

SKILLS

Programming: C#, Python, Visual Basic, Java, C++, MATLAB, LabVIEW

Software Packages: SolidWorks, Microsoft Office Suite, Microsoft Project, NET, Microsoft Visual Studio, GAMBIT, ANSYS, FLUENT

Hand Tools: Soldering Equipment, Lathes, Drills, Presses

Laboratory: Electrophoresis, Pipetting, Petri dish preparation, Slide Preparation

Spoken Languages: Arabic (Fluent – Native), French (Conversational)

RESEARCH EXPERTISE

- Multi-scale and multi-physics heat exchange simulation and optimization.
- Approximation techniques using Design of Experiment and Metamodeling
- Transient and steady state modeling of vapor compression systems and components
- Two-phase flow
- Indoor air quality
- CFD simulations of room air flow and heat exchanges

RESEARCH EXPERIENCE

Center for Environmental Energy Engineering, University of Maryland Aug. 2020 – Present
Graduate Research Assistant College Park, MD

Next Generation Heat Exchanger (NGHX)

- Engaged in brainstorming sessions and workshops to identify and define geometries for the next-generation of heat exchangers, resulting in 23 novel heat exchanger ideas.
- Conducted extensive literature and patent reviews on new heat exchanger designs, geometries, materials, and innovations for use in development of future heat exchangers.
- Concepted and designed a prototype heat exchanger design based on currently available manufacturing technologies and finding from optimization results.

- Building a heat exchanger with potential to have a 50% reduction in volume and 66% reduction in materials that will also have a potential 90% computational time reduction.
- Reconfigured and expanded the analysis framework for conventional heat exchangers and developed a similar framework for optimized designs to show an up to 40% volume reduction and 30% material cost reduction.

TransRef: Transient Refrigeration Systems Simulation Tool

- Updated and improved TransRef user interface to comply with other UMD CEEE software.
- Fabricated new system component models to extend TransRef capability for predicting loads on the trans-critical systems, heat pumps, cycles with PID variable Speed Compressors, and psychrometric loads.
- Stimulated a successful trans-critical CO₂ refrigeration cycle for household refrigeration and application.

Refrigerant Charge Inventory in Household Refrigerators with Multiple Evaporators

- Fabricated a test facility for a charge migration study in multi-evaporator household refrigeration applications.
- Measured the two-phase phenomenon and void fraction models to analyze their effect on the HX charge inventory model
- Presented a newly developed refrigeration system charge estimation tool using Excel VBA with the void fraction model and presented it to stakeholders.

Department of Mechanical Power Engineering, Cairo University

Oct. 2017 – Oct. 2019

Research Assistant

Cairo, Egypt

- Provided innovative designs for the ventilation of the historical tombs of the kings in Luxor to minimize mold growth and extend artifacts preservation through means of CFD simulations.
- Generated educational materials for the electronics cooling course developed through the HEEP program and Engineering economy course (VISION project) granted by TEMPUS.

Dr. Ezz Mechanical Engineering Consultancy

Oct. 2015 – Sept. 2017

Research Engineer

Giza, Egypt

- Implemented a PLC based controller for AMADA CNC resulting in a replacement part savings of \$10,000.
- Installed PLC and Motor controllers, sensors and actuators to accurately take measurements and track the efficiency of newly developed parts.
- Developed a Ladder diagram model for the CNC control and developed a graphical user interface wrapper using .Net framework.

TEACHING EXPERIENCE

Center for Environmental Energy Engineering, University of Maryland

Aug. 2021 – May 2023

Graduate Teaching Assistant

College Park, MD

- Taught “Sustainable Energy Production and Utilization”, a graduate level course to a class of 15 students who were enrolled as part of their Master’s degree program.
- Complied and selected course materials, developed course syllabus, and conducted regular office hours for students.
- Integrated active teaching pedagogy, listening, and interaction skills in the classroom to encourage and promote meaningful and participation during class meetings.
- Created a pipeline for students struggling during their semester to seek out additional services, such as tutoring, counseling, and other services on an as needed basis.

Department of Mechanical Power Engineering, Cairo University

Sept. 2017 – Oct. 2009

Teaching and Research Assistant

Cairo, Egypt

- Led weekly classes and held consistent office hours, graded weekly homework assignments.
- Held oral examinations, and graded mid-term examination for: Refrigeration and Air Conditioning, Thermodynamics, Conventional Power Plants, and Engineering Economy courses and Measurement Laboratory.
- Improved lab performance and fixed experiments.
- Participated in video production to demonstrate experiments.

INVENTION DISCLOSURES AND PATENTS

1. Flexible-Actively Controlled Heat Exchanger Based on Thin-Film Technology; UMD Invention Disclosure PS-2007-05.

2. Compact Mini-Channel Heat Exchangers; UMD Invention Disclosure PS-2007- 116.
3. A New Multiscale Approach to Design Novel Heat Exchanger; UMD Invention Disclosure PS-2008-033.

ADDITIONAL EXPERIENCE

Commercial Buildings Mechanical System Design Dept. , Dar-Alhandasha <i>Summer Intern</i>	Aug. 2002 Cairo, Egypt
Mechanical Design Dept., Consulting Engineering Bureau <i>Summer Intern</i>	July 2002 Cairo, Egypt
RoboCon Contest <i>Team Leader -Automated Guided Vehicle</i>	May 2002 Cairo, Egypt
Conrad International Cairo <i>Property Operation Intern/HYAC/BMS/Domestic Water System Maintenance</i>	June – Aug. 2001 Cairo, Egypt
Petrokima Co. <i>Building Management System Design Summer Intern</i>	Aug. 2000 Giza, Egypt
Pcugot Service Center , Ghamrah <i>Automotive Maintenance Summer Intern</i>	June 2000 Cairo, Egypt
New Generation Motors Corporation <i>Electric Battery Management, Test Data Analysis Summer Intern</i>	June – Aug. 1999 Ashburn, VA

HONORS AND AWARDS

A. James Clark School of Engineering Future Faculty Fellowship	2022 – Present
Research Assistantship, Center of Environmental Energy Engineering (CEEE)	2021 – Present
A. James Clark School of Engineering Fellowship	2021 – Present
Best Paper Award in Terrestrial Energy, AIAA	Jan. 2020
Cairo University Teaching and Research Assistantship	2016 – 2017
Cairo University Excellence Assistantship Award	2015 – 2017
Schulenberger Sponsorship	2014 - 2016

PROFESSIONAL MEMBERSHIPS AND ACTIVITIES

University of Maryland Sustainability Group	Jan. 2018 – Present
University of Maryland Leadership Network	Aug. 2017 – Present
American Society of Mechanical Engineers	August 2018 – Present
Association of Energy Engineers	February 2017 – Present
<ul style="list-style-type: none"> • Founder of student chapter for Association of Energy Engineers at the University of Maryland. • First president elect for AEE UMD student chapter. • Hosted a lecture series in energy production and utilization. • Hosted group discussions and field trips to solar PV manufacturing plant. 	

- Participated in the production of a video submitted to Xprize for the "Crazy Green Idea" contest.
- Monitor for GlobalCon 2017 and WEC 2018.

American Society of Heating, Refrigerating and Air-Conditioning Engineers March 2015 – Present

- Started a new task group within ASHRAE for Optimization in the HVAC&R industry.
- Vice Chair for ASHRAE TG I-Optimization.
- Corresponding member for ASHRAE Technical committees TC1.1, 1.3, 8.4, and 8.5.
- Secretary for ASHRAE TC1.1.
- Program sub-committee chair for ASHRAE TCB.5.
- Reviewer for the HVACR Journal.

Egyptian Syndicate of Engineers Aug. 2013 – Present

VOLUNTEER EXPERIENCE

Maryland Mentor Corps Jan. 2021 – Present

STEM Mentor Prince George’s County, MD

- Mentored small groups of 6 elementary students on basic math and science principles at Prince George’s County public elementary schools.
- Developed activity plans for students framed around their math and science curriculum to incorporate creativity and imagination into our sessions to encourage better understanding of concepts.

Engineers Without Borders Sept. 2022 – May 2023

Water System Design College Park, MD

- Drafted 4 different rainwater catchment systems in SolidWorks to determine best system to be installed in a village in Uganda by volunteers on an upcoming trip.
- Prototyped 2 of the designs while working with 3 other designers to test for effectiveness, efficiency, and to estimate overall cost of final project.

Discovering Engineering June 2022 – Aug. 2022

Lab Instructor College Park, MD

- Designed age and skill appropriate projects in mechanical engineering to be completed by students attending the program.
- Communicated laboratory and equipment safety for groups of 15-20 students rising into 11th and 12th grade.
- Oversaw and assisted in the design and production of student projects over the duration of the program, culminating in each student giving a five minute presentation on their project and what they gained from completing it.

Howard Community College – Kids on Campus June 2021- Aug. 2021

STEM Instructor Columbia, MD

- Taught “Creative Design & Robotics” and “Advanced Robotics” to classes of 15 local youth as a part of a summer learning camp.
- Created detailed instructions and outlines for end of camp projects to be completed by students.

Habitat for Humanity Egypt Jan. 2016 – May 2019

Designer and Builder Cairo, Egypt

- Aided in the design of 8 new living units being built in Cairo, utilizing SolidWorks for the design process.
- Participated in the construction of living units for low-income Egyptians as a part of a building crew of 20 individual volunteers.
- Instructed new volunteers on correct use of common building hand tools to ensure a safe and efficient worksite.
