

UNIVERSITY OF MARYLAND | COLLEGE PARK, MD

COMMENCEMENT

MAY 20

2021

A. JAMES CLARK
SCHOOL OF ENGINEERING

Spring Graduates,

Congratulations!

Our faculty, staff, alumni, supporters, and your families and friends are immensely proud of your academic and personal accomplishments. A special thanks to those families and friends for supporting your education and the Clark School's work: They are critical to your and our success.

As you know, we believe engineers are builders of the modern world. At the Clark School, we practice engineering as a public service: Focusing our talents and energy on innovations for families we may never meet, and communities we may never visit, but will benefit from Fearless Ideas. More intelligent robots and drones. More effective fire protection systems. Faster, more powerful quantum computers. That's how engineers like you make MPact.

We are excited to experience your contributions to society and look forward to those families and communities benefiting from them.

Go Terps! Be TerrapinSTRONG!

A handwritten signature in black ink, appearing to read "Jim Fowler". The signature is fluid and cursive, with a small "r" at the end.

*Interim Dean, A. James Clark School of Engineering
Professor, Department of Materials Science & Engineering*

Celebrate Our Graduates on Social

Share your graduation photos by using the hashtags **#UMDgrad**, and **#ClarkSchoolGrads**, and tagging the Clark School on social media!

SPEAKERS

Phil Wiser '90, *Executive Vice President and Global Chief Technology Officer of ViacomCBS*

Jawairia A. Ahmad, Ph.D. '21, *Civil Engineering*

Elizabeth Childs '21, *Mechanical Engineering*

GUEST SPEAKER

Phil Wiser '90

Executive Vice President and Global Chief Technology Officer of ViacomCBS

Phil Wiser is an industry-leading technology and digital media entrepreneur and executive. He serves as Executive Vice President and Global Chief Technology Officer of ViacomCBS, leading global technology strategy, shared services, operations, and transformation of the combined company.

Prior to the merger of Viacom and CBS in December 2019, Wiser was the Executive Vice President and Chief Technology Officer of CBS Corporation, where he oversaw technology strategy and development across the company's entire business portfolio. Before joining CBS, Wiser served as Chief Technology Officer at Hearst. Wiser was also the Chief Technology Officer at Sony Corporation of America and Sony Music, responsible for creating the digital businesses at Sony Music, including the forging of the groundbreaking deal to launch iTunes.

Earlier in his career, Wiser was a key pioneer in the creation of the online digital music industry and the over-the-top TV market as founder of Liquid Audio and Sezmi. Both companies were the first to create commercial Internet-based media offerings in music and television. He has numerous patents and broke new ground across the areas of IP-based content delivery, machine recommendation systems, video delivery over the Internet, and cybersecurity.

Wiser is an angel investor and serves on the Board of Trustees at the Rock and Roll Hall of Fame and Museum, as well as the Board of Visitors at the A. James Clark School of Engineering.

Honored Guests

GRADUATE STUDENT SPEAKER

Jawairia A. Ahmad

M.S. '18, Ph.D. '21, Civil Engineering

Jawairia Ahmad is graduating with a Ph.D. in Civil and Environmental Engineering. She earned a Master's degree in Civil Engineering from the Clark School.

During her graduate studies, she worked as a research assistant with Associate Professor Barton Forman and collaborated on three NASA-funded projects aimed at improving the spatiotemporal hydrometeorological modeling capabilities, particularly across high mountain Asia.

She was awarded a Graduate Summer Research Fellowship and Outstanding Research Assistant Award for her research initiatives. Through her work, she found time to serve her peers as President of the CEE Graduate Student Council.

After her graduation, she plans to return to her native Pakistan and contribute to the development and protection of regional and global water resources.

Honored Guests

UNDERGRADUATE STUDENT SPEAKER

Elizabeth Childs

'21, Mechanical Engineering

Elizabeth Childs is graduating with a Bachelor's degree in Mechanical Engineering. She interned at General Electric Aviation as a turbo machinery process engineer, as well as at Key Technologies as an engineering consultant for medical device companies. She conducted research in robotics and three-dimensional printing at the University of Maryland, Oregon State University, and the Cambodian Institute of Technology. Elizabeth was awarded the AABE Mid-Atlantic and Dominion Energy Scholarship, the Banneker Key Scholarship, and the Mechanical Engineering Academic Achievement Award.

During her time at UMD, Elizabeth played violin for the Gamers Symphony Orchestra and battled combat robots in the Leatherbacks club. Additionally, she traveled to Spain, Ecuador, New Zealand, and Australia through multiple study abroad courses. She was also a teaching fellow for thermodynamics over multiple semesters, creating quizzes and videos to assist with transitioning to an online learning environment.

Upon graduation, Childs will pursue a Ph.D. at Stanford University as a GEM, Edge, and Knigh-Hennessy Scholar to investigate human robotic interaction and augmented reality. She aspires to apply these technologies to improve educational resources that provide equity in higher education and pre-professional training.

CONGRATULATIONS GRADUATES!

2021

ABOUT THE A. JAMES CLARK SCHOOL *of* ENGINEERING

The A. James Clark School of Engineering at the University of Maryland serves as the catalyst for high-quality research, innovation, and learning, delivering on a promise that all graduates will leave ready to impact the Grand Challenges (energy, environment, security, and human health) of the 21st century. The Clark School is dedicated to leading and transforming the engineering discipline and profession, to accelerating entrepreneurship, and to transforming research and learning activities into new innovations that benefit millions.

Our broad spectrum of academic programs, including the world's only accredited undergraduate fire protection engineering program, is complemented by a vibrant entrepreneurial ecosystem, early hands-on educational experiences, and participation in national and international competitions.

The Clark School is leading research advancements in aerospace, bioengineering, robotics, nanotechnology, disaster resilience, energy and sustainability, and cybersecurity. From the universal product code to satellite radio, SMS text messaging to the implantable insulin pump, our students, faculty, and alumni are engineering life-changing innovations for millions.

Learn more at www.eng.umd.edu.
